Post of Chemistry Adviser

Thank you for your interest in the above post. The application pack includes:

- An application form
- A short note about CLEAPSS and its work.
- A copy of the CLEAPSS strategic plan 2014 - 2019
- A job description for the post of Chemistry adviser
- A person spec for the role of a CLEAPSS adviser

We are looking for someone who has enthusiasm for and experience of teaching chemistry at Key Stage 3, GCSE & A level. The successful applicant will play a key role in shaping CLEAPSS guidance and support for practical chemistry. This will include updating existing guidance as well as designing new resources to cover emerging areas of the curriculum. There is a significant opportunity to develop and deliver exciting training for teachers and technicians.

Whilst the role includes producing H&S advice and guidance the emphasis at CLEAPSS is very much on good quality practical work to support learning. Training and support will be available for the suitable candidate in the more technical aspects of H&S legislation.

We are looking to appoint someone to start as soon as possible.

A relocation package up to £15,000 is available for the successful candidate

Completed application forms should reach CLEAPSS by Tuesday 2nd May

Interviews will be held at CLEAPSS, Brunel University on Tuesday 9th May

If you wish to have an informal conversation about the role or about what CLEAPSS does please ring the Director, Steve Jones, Deputy Director, Matt Endean at CLEAPSS.

I look forward to hearing from you.

Yours sincerely,

Steve Jones
Director
